

RADIO

Radio Profession Young Man's Game

Veteran Says Opportunity Lies in Invention for Electrical Graduate.

By CHARLES FRESHMAN

The rapid development of the radio art has created a vast field for further productive research. New and useful improvements have been constantly appearing, and there has been a growing tendency among radio manufacturers to simplify the operation and increase the efficiency of their radio receivers.

Behind the scenes, as it were, are the radio technicians, the radio engineers and the laboratory staffs who are directly responsible for the marketed product. The fruits of their efforts, combined with the efficiency of systematic production, are the main factors which allow one to purchase a good receiver at a reasonable price. Although there are many good receivers, there are also some which are very poor indeed, both electrically and mechanically. The receiver itself is evidence of good or bad engineering practice. Nor is this mute evidence in any way. By its performance you shall know it. If you listen in you can readily tell whether it oscillates uncontrollably, distorts the music horribly, or is so extremely insensitive and tunes so broadly that it is wrong to call it a product of engineering skill and design.

Peer Designs Paid.

The day of the poorly designed set is quickly passing, and those types which have given cause for concern, such as those which radiate powerfully and produce inexpressible noises, are losing popularity. No longer will the public have to contend with radio receivers which do not warrant being called such. For this, we have the progressive radio laboratory staffs to thank.

Radio engineering is becoming more and more one of the most important professions. Its scope is already so large that no one engineer can hope to learn everything on the subject. Engineers, to keep up with the times, have found it necessary to specialize. And in specialization is sounded the keynote for their individual and collective success.

The young and ambitious man desists of studying radio engineering as a profession must first study electrical engineering. It is most essential that he do this, for without the solid and basic fundamentals of electricity there can be no competency as a radio engineer.

Hobby Course.

In fact, of the few college courses that are now available in which to

Process of Elimination in Buying Radio Outfit.

By FRANK REICHMAN, B. S. E. M.

What Price Radio?

With the public buying their radio sets already made and being faced with the choices of scores of manufacturers, there is naturally considerable competition in the field of the average citizen who wants to put his hands on a radio receiver.

In the first place, it must be recognized that the crystal set has practically passed out of use because it is not selective.

The tube sets are also out because they will not operate local speakers and local phone reception is also obsolete.

The three-tube regenerative receiver, while it is selective and will get considerable distance, will radiate to the annoyance of everybody else, and may cost twice what a standard set of this type.

The eight-tube superhet is too expensive for the average listener and also requires much shielding that it may be a source of confusion. Also, the expense is hardly justified by the results.

By this process of elimination, we are left to the radio frequency converter, which has proved their worth and are now standard. Perhaps one selected they are relatively inexpensive to buy, require little or no attention and demand the minimum of maintenance.

A good standard radio frequency set can be bought for around \$200 dollars, batteries, charger and aerial equipment will run out more than \$200 and a car radio speaker can be had from \$20 to \$30. This will make the total cost around \$350. A set of this type will give satisfaction under any and all circumstances.

This year there are radio frequency sets on the market ranging from six to eleven tubes. These additional tubes are necessary where shielding is used in the set. Attention has been adapted because the ordinary antenna coil will pick up all the other currents and noise that are on the wave to which the set is tuned, causing interference and poor reception.

The object of the shielding is to keep out these stray currents and give greater selectivity. This same end can be and is accomplished by the use of the simplest type of coil which does not pick up many currents. This per chance is a set almost equal a tremendous amount of the space packed up by the usual antenna that

AGED TEXAN TELLS OF BUFFALO HUNTS

Vast Herds of Animals Roamed the Plains.

Tahoka, Texas—Frank M. Sherrod of Tahoka is one of the few men still living who hunted buffaloes for their meat in the 70's. His first trip to the plains region of northwestern Texas on a buffalo hunting expedition was before the wholesale slaughter of the animals for their hides began. As a means of preserving Mr. Sherrod's reminiscences of pioneer days, J. E. Haley, field representative of the Panhandle-Plains Historical Society visited Sherrod a few days ago and obtained from him an account of his buffalo hunting experiences. One of the interesting statements made by Mr. Sherrod was that in 1875 buffaloes were killed in great numbers for their tongues, considered a great delicacy.

His First Buffalo Hunt.

"I was just a boy and was out here on the buffalo range in 1874 and 1875," he said. "It was seventeen years old when I came out the first time.

We came out from Brown county about 200 miles to the east, and there were only five of us. We hunted for meat. That year you could see 200 and 300 coyotes in a bunch, but the second year these animals were thinned out. There were many men buffalo hunting, who killed the coyotes for their skins.

"We really came a lot further out than necessary to kill the buffaloes, but we had lots of fun. There were tens of thousands of buffaloes everywhere. When we got tired of one place we would move to another. We made houses of poles, covered with buffalo hides, lined and doored with the same. The second winter we came out here there were thirty-two of us from Brown county, and I killed 300 buffalo that winter myself. I didn't do anything but hunt."

"The first winter we loaded our wagons with meat. We took yearlings and two year olds and dried them whole. We brought a wash kettle along with us and rendered up thirty-two kettles of fat marrow and tallow. This got so hard that you could throw it around like a chunk of wood. We would take an ax, break the bones and then scrape the marrow out. The marrow and tallow were used for cooking, making soap and the like."

"We killed enough buffaloes to furnish the people of Brown county with meat all the next year. Twelve months afterwards the meat would be as hard as a stone on the outside, but good and fresh when cut into. We didn't salt our meat. The majority of the meat we eat in big chunks, as large as a ten pound bucket, and dried some of it we carried back in the whole bags."

"In killing the buffaloes we used muzzle guns and it cost us five cents a shot. We met two fellows up on the head of the Colorado river the second year who had been out two months and hadn't killed a buffalo. They had these 'effrons' rifles and tried to some Indians to kill some buffaloes for them. We went out and killed about fifteen for them."

No Trouble With Indians.

"There were lots of Indians the first year. We left our camp many times and would look back and see the Indians sitting on the tops of our wagons and moving around our camp. They never would bother anything except something to eat or our mules. We had to guard the mules every night. Many a night we have gone off into thickets without mules, and the Indians would come into camp and pass all around us. There were more Indians over in Crosby county than around Tahoka lake. We never did have a fight with them, as they never did bother us. Lots of times we would ride around a point and meet a bunch of Indians face to face. We could both stop, and in a minute the Indian would turn his horse and then all would turn and ride back the way they had come."

"We never bothered with the buffalo hide. In 1874 except to throw a few up on top of our meat when we started back. There was a spring at Tahoka lake, but no water in the plains lakes then."

"The second winter there were hundreds of men killed for hides. We drove on traps in 1873 and must have had about fifteen wagons that year. There was an outfit from Fort Worth on the Colorado river which was killing just for the fangs. They sold them for \$100 a pair."

"The mystery was cleared because Kauffer talked too much. One of his lapses from caution was promptly reported to the police. He was shadowed for several weeks, and finally connected with the robbery and arrested."

WOMEN BARRED ON "PARADISE ISLAND"

"No Money, No Trouble" in Restful South Seas.

San Francisco, Calif.—Nine willing Robinson Crusoes, who though young, are weary of the tumult of cities and the hubbub of women, are here preparing to colonize a new "Paradise Island" in the South Seas.

"No trouble and no women; no money, and nobody to ask you for any," is their motto.

The intended home of the self-appointed castaways is Santa Maria Island, lovely bit of land exactly on the equator in the Galapagos group.

The men are the crew of the Ecuadorian auxiliary schooner Floreana, at present docked here, who own their own ship, and, as members of "La Colonia de Floreana," are owners of the modern prototype of Robinson Crusoe's home on Juan Fernandez Is-

land.

Subsisting upon raw and uncooked foods and wild berries, with clothing enough only to decently cover her body, no stockings, mittens and no hat, she wandered many miles through the dense forests from one camp to the other and often crouched in the corner of a deserted cabin for the night.

At daybreak she would walk another ten or fifteen miles back to her own steleless shack, or go on many miles in another direction to some miner's cabin for a cupful of coffee.

Wild Woman's Home.

Her old tumbled-down cabin at Central mine, with windows stuffed with old papers or potato bags, its pile of ashes in the middle of the floor, where the old rusty stove had long since fallen apart, the chairs and kitchen table decayed where they stood, and in the corner of the bare room a pile of dirty rags which served her as sleeping quarters for these many years.

Each man has his particular reason for fleeing from the society of women. Three of the Floreana are divorced. Two are married and separated from ill-natured or unfaithful wives. The others of the company admit they are "disappointed men."

Then there are 21 men, ranging in ages down to eighteen years. Thirteen of them were left on Santa Maria Island before the Floreana came to San Francisco a month ago.

Capt. August Christensen, forty-five, and Capt. Anton Stub, fifty-one, mariners, are the leaders and the oldest of the colony.

They have, of course, the intention of colonizing their island with additional people eventually and reaping fortunes in tilling its fertile soil. They also contemplate fishing and whaling enterprises in the populous tropical waters of the vicinity.

The islet was selected by the adventurers first, because the Ecuadorian government, which owns the 41 Islands of the Galapagos, granted them the land, and second, because of its romantic history and isolation.

Centuries ago, Santa Maria was Charlie's Island, refuge of Pacific buccaneers. Only one island of the Galapagos is now uninhabited. It is 50 miles from the Crusoe's home.

Find \$2,000,000 "Rose."

Diamond; Arrest Two

Paris.—The famous rose diamond, known as the "Grand Conde," stolen from the gem tower in the chateau of the Due d'Anjou in Chantilly early in October, has been recovered.

The famous gem was found in a valise, the stone wrapped carefully in cotton. Two of the alleged thieves, Leon Kauffer and Emile Souyer, who crowded a flooded moat and climbed into the gem tower on a ladder, were arrested and are reported to have confessed.

Retained Keen Mind.

Maggie had degenerated in the matter of clothing and way of living only;

her mind was keen, and what stories she could tell of the wild things she knew so well.

Whatever transpired in the life of this strange woman to change her from a shy, sheltered, golden-haired, beautiful girl as she was fifty years ago at the time her mother died, into a silent hermit of the great forests, no one can say. She kept her own council—shared confidences with none and died with her secret on her frozen lips.

Old Maggie was buried at Eagle Harbor near the spot where she stood over the little grave fifty years ago and cursed the fate that had robbed her of the mother she idolized, and changed her into a wild woman of the great Michigan forests at one stroke.

Old Maggie Was Buried at Eagle Harbor.

The famous gem was found in a valise, the stone

STATE OF STAINES

To all persons interested in either of the State's hereinafter named: The State of Maine, held at Paris, is and for the County of Oxford, on the third Tuesday of December, in the year of our Lord one thousand nine hundred and twenty-six. The following matters having been presented for the action thereon hereinafter indicated, it is hereby ORDERED:

That notice thereof be given to all persons interested, by causing a copy of this order to be published three weeks successively in the Oxford County Citizen, a newspaper published at Bethel, in said County, that they may appear at a Probate Court to be held at said Paris, on the third Tuesday of January, A. D. 1927, at 9 of the clock in the forenoon, and be heard therein if they see cause.

James H. Hastings, Esq. of Bethel, deceased first and last account presented by his attorney, Harold Hastings, executor.

Mary A. Chase, late of Upton, deceased, petition for order to distribute her estate remaining in her hands presented by Mrs. M. West, administrator.

Augustine Hartnett, late of Bethel, deceased, petition for order to distribute his estate remaining in his hands presented by Herman J. Hartnett, administrator.

Elmer H. Hastings, late of Bethel, deceased first and last account presented by Harold Hastings, executor.

Mr. Andrew of Albany was a caller in town. He had quite a large boar with him that he caught in a trap. It weighed 14 pounds.

Mr. F. E. Russell, Supt. of Schools, was in this vicinity one day last week.

Paul Crozat was a caller in town recently.

W. C. Cross hauled sawdust for Mr. Gill one day last week.

WEST GREENWOOD

Mary Lowe of Bethel called on Mrs. Brarden one day last week.

Nellie Harrington returned to her school in Massachusetts Sunday.

Mrs. Lillian Lapham of Locke's Mills spent her birthday with her mother.

Mr. Bradford on Howe Hill is soon to have a telephone put in.

Mrs. Nellie Cross and daughter were in Howe Hill Sunday.

Mrs. Alice Chapman and her sister called on Mrs. Brarden who was very glad to see her.

Mr. Bartlett of Bethel drove team for John Gill one day last week.

Rae Cummings spent Sunday at his home.

Gertrude Harrington returned to Lewiston Monday.

Mr. Andrew of Albany was a caller in town. He had quite a large boar with him that he caught in a trap. It weighed 14 pounds.

Mr. F. E. Russell, Supt. of Schools, was in this vicinity one day last week.

Paul Crozat was a caller in town recently.

W. C. Cross hauled sawdust for Mr. Gill one day last week.

LOCKE'S MILLS

Miss Thelma Richardson visited with her relatives at West Paris the week end.

Mr. and Mrs. King Bartlett were at West Paris Saturday evening.

Walter, Henry H. Hastings, Judge of said Court at Paris, on the first day of December in the year of our Lord one thousand nine hundred and twenty-six.

ALBERT D. PARK, Register.

NOTICE

The subscriber hereby gives notice that he has been duly appointed executor of the estate of Dr. M. Bascom, late of Bethel in the County of Oxford, deceased, and given bonds as the law directs. All persons having demands against the estate of said deceased are directed to present the same for settlement, and all indebted thereto are requested to make payment immediately.

ELBERT D. PARK,
Bethel, Maine
Dec. 22, 1926. 12:30 P.M.

STATE OF MAINE

To all persons interested in either of the State's hereinafter named.

As Probate Court, at Paris, is vacated on and for the County of Oxford, on the twenty-eighth day of December, in the year of our Lord one thousand nine hundred and twenty-six. The following matters having been presented for the action thereon hereinafter indicated, it is hereby ORDERED:

That notice thereof be given to all persons interested, by causing a copy of this order to be published three weeks successively in the Oxford County Citizen, a newspaper published at Bethel, in said County, that they may appear at a Probate Court to be held at said Paris, on the third Tuesday of January, A. D. 1927, at 9 of the clock in the forenoon, and be heard therein if they see cause.

Miss Elizabeth G. of Norway, deceased, will be held for probate of her estate at the office of Asa E. Day, Esq. attorney of the same to said Probate Court as aforesaid in said will, presented by said Asa E. Day, the attorney thereon aforesaid.

Frank A. Lawrence, late of Hartland, deceased, petition that Maurice H. Pease, a single person to be appointed administrator of the estate of Dr. C. Brewster presented by George W. Lawrence, son and exec. trust.

Albert J. Weston, late of Paris, deceased, petition that Harry M. Shaw or some other suitable person to be appointed administrator of the estate of said deceased presented by Albert J. Weston, son and exec. trust.

Walter Wardwell of Milan, New Hampshire, deceased, petition for a new will and trustee real estate presented by Walter M. Wood and Walter T. Read, two of the executors of the estate of said deceased.

Albert D. Park, of Bethel, deceased, first and last account presented for settlement by Cleavene V. Stevens, guardian.

Walter, Henry H. Hastings, Judge of said Court at Paris, file record which day of December in the year of our Lord one thousand nine hundred and twenty-six.

ALBERT D. PARK, Register.

RESOLUTIONS

On the death of Sister Jessie Anna Weston, our Heavenly Father has given to us His infinite wisdom and mercy in calling to His eternal home our dear Sister, Mrs. Jessie Anna, there to be at peace.

Noting that we, the members of Bethel Congreg., No. 26, in the spirit of love, justice, and truth to our brethren and sisters, are bound together by mutual sympathy and concern, and to it further.

Resolved, that a copy of these resolutions be spread upon our banner, and a copy sent to the brethren and sisters here as a token of our grief and sympathy and that a copy be granted to the Oxford County Citizen.

FRANCIS CLYDE,
CARLIE MERHILL,
LILLIA T. MORSE,
Commissioners on Resolutions.

Job Printing

We are equipped to handle any kind of Job Printing, and when it comes to service, we can only offer you the best guarantees of job that you give us a trial.

I make such nice mistakes in life,
So wild and unconventional.
But should I call them all mistakes?
They're really quite intentional.

ANDOVER

The annual meeting of the stockholders of the Andover Water Company was held at the residence of Frank P. Thomas, Tuesday evening, Jan. 4, and elected the following officers: Clerk, H. M. Thomas; Directors, Fred French, C. A. Rand, Clayton Swett, E. P. Thomas and H. M. Thomas. Immediately after the adjournment of the stockholders meeting, the directors held their meeting and elected these officers: President, Fred French; Vice President, C. A. Rand; Secretary and Treasurer, H. M. Thomas. A dividend of 5% was declared on all outstanding stock.

Mr. and Mrs. Robert Hill and family were guests of Mr. and Mrs. E. K. Sheldon Sunday evening.

Ernest Brown hauled a load of wood to Standish Monday.

Merton Kimball from South Waterford called at Merrit's Sawmills, Sunday afternoon, to attend the funeral services of Matilda Bird.

Harold Cannell called on his friend Lynn Kimball Sunday.

Mrs. Isaac Wyndham returned home from North Norway, where she has been nursing, on Sunday.

turned home.

The Misses Eva and Merle Kimball were callers at Abner Kimball's, Tuesday.

Ernest Brown hauled a load of wood to Standish Monday.

Merton Kimball from South Waterford called at Merrit's Sawmills, Sunday afternoon, to attend the funeral services of Matilda Bird.

Friends and relatives were saddened to hear of the death of Matilda Bird.

Funeral services were held at S. Greenleaf's Sunday and the remains put in the tomb until spring.

Mr. Charles Connor and daughter Velora, were dinner guests at A. B. Kimball's Sunday.

Orrin Lord and Leonard Armstrong were callers at L. N. Kimball's Sunday.

Mrs. Charles Gorman and Miss Pauline King were guests at Songe Lake Cottage Tuesday.

George Morey is helping Herman Brown cut birch.

SIMPLE STERILIZER FOR DAIRY UTENSILS

Many dairies have boilers which make steam, available for sterilizing dairy utensils. A simple, inexpensive, and very efficient combined water heater and sterilizer can be used on farms which do not have boilers. This apparatus is a galvanized iron box with a perforated false bottom. This box is placed on a brick, stone, or concrete setting, and a fire built underneath.

Anyone interested in building such a sterilizer can secure free plans and directions from the Bureau of Dairy Industry, U. S. Department of Agriculture, Washington, D. C.

THURSDAY, JANUARY 13, 1927.

Mr. and Mrs. Alvin Smith, little son, Austin, Hospital, Portland treatment. They brother, John Rand, Portland, Wednesday.

The marriage of Oxford and Mrs. Canyon, took place Saturday, Jan. 13th. The present in Clinton.

CANTON
 Mr. and Mrs. Alton Banks took their
little son, Austin, to the Children's
Hospital, Portland, Wednesday, for
treatment. They were guests of his
brother, John Banks, and wife of South
Portland, Wednesday night, returning
Thursday.

The marriage of Leon O. Norwood of
Oakland and Mrs. Luella G. York of
Canton, took place at Portland, Tues-
day, Jan. 3rd. They will reside for the
present in Canton.

The Y. P. C. U. will meet Saturday
evening at the home of Mrs. Evie
Burks.

Mrs. Blanche Richardson is slowly
improving from her recent accident.

Mrs. Elvina E. Godine and daughter
will go this week to Auburn, where they
will board during the winter.

Marcia Lavorgna is giving lessons on
the violin. Mr. Lavorgna is one of the
finest players in this section. He studied
for two years with C. Roland Ronsoner
of Boston.

Mrs. Minnie Oliver is still confined to
her bed with tonsilitis.

Miss Angie Swett has been visiting
friends at Livermore Falls.

Mrs. S. T. Hayden, who has been
ill, is better.

A joint meeting of the men and women
of the Farm Bureau will be held at
the community hall, Jan. 13th. This
will be a general planning meeting and
a good attendance is desired. The
meeting will be open to the public.

Mrs. Harold Bryant is seriously ill
and threatened with pneumonia. Her
mother, Mrs. Charles Kendall, who was
visiting in Ayer, Mass., has been sent
for.

A new flag has been purchased for the
school yard.

Word has been received of the seri-
ous illness of Mrs. Ralph W. Bicknell of
Winthrop, formerly of Canton.

Mr. and Mrs. Leon A. Harding enter-
tained nine tables at what Thursday
evening. The first prize for ladies was
won by Ethel Russell and first for men
was won by Herman Childs, the boyish
going to Donald Bonney. Refreshments
were served.

The hockey team won Wednesday's
game from Dixfield. Score 11 to 2.

Mrs. José Young Hall of Livermore
who passed away last week was well
known in Canton. Her husband, Will
Hall, Hall, is seriously ill.

Judge Benjamin L. Cleaves of the
Associated Industries of Maine, A. L.
T. Cummings of the State Chamber of
Commerce, and L. C. Minor of the Maine
Facility Bureau of Portland addressed
the citizens of Canton at the Opera
House, Saturday evening, in connection
with the moving pictures. Mr. Minor
spoke of the benefits which would be
derived from the success of the Custer
Plywood Co. and the need of the co-
operation of the citizens, etc.

John Brewster has gone to Hartford
to work for Frank Bragg.

Miss Wilma Hussey has returned
from Portland.

The joint installation of Canton En-
campment and Anasagunticook Lodge
was held Friday evening. The camp
fees were installed by D. B. Arthur
Newton and the subordinate officers by
Walter G. Hicks of Rumford and
assistants. An oyster supper was served
at the close.

The officers of the Relief Corps were
installed Tuesday by Past President
Irena T. Hall, assisted by Mrs. Annie
Towle.

Ethan Tripp has gone into the woods
with his work team for the winter.

The installation of Ponemah Rebekah
Lodge will be held Friday evening.

NORTH NEWRY

Mr. and Mrs. A. C. Littlehale who
have been visiting at Fred Wright's since
Christmas returned to their home in
Errol, Sunday.

Services were held at the church Sun-
day A. M. with a good attendance.

Mrs. Amy Bennett, who has caring for
Mrs. Robert Dean and baby returned
home Saturday.

Fred Kilgore, who underwent an op-
eration at the new Community Hospital,
Rumford last week, is reported as get-
ting along nicely.

Catherine Hutchins was a recent over-
night guest of Beatrice Appleby and
Evelyn Pendleton.

The infant son of Mr. and Mrs.
Robert Dean, born on Christmas day,
died Saturday night. The cause has
not been learned at this writing. The
deep sympathy of their friends and
neighbors is extended to them at this
time.

Harry Isachsen was in town Monday.
Fred Wright was in Bethel Monday.
Miss Doris Morton was at home over
the week end.

**Starts
THURSDAY
JAN. 20
AT 9 A. M.**

Store Open Every Evening

You all know that a merchant always makes
an effort to clean up his stock the last part of
the season in order to make room for the
following season's goods. That's what we
are doing now. Our entire stock must move
regardless of cost. Come all of you and share
in this great opportunity which happens once
a year and continues as long as the goods last. Come early as some lots are limited.

Keep in Trim!

Good Elimination Is Essential to Good Health.

THE kidneys are the blood filters. If they fail to function properly there is apt to be a retention of toxic poisons in the blood. A dull, languid feeling and, sometimes, toxic backaches, headaches, and dizziness are symptoms of this condition. Further evidence of improper kidney action is often found in the presence of a heavy passage of secretion. Back year, more and more people are learning the value of Doan's PILLS, a stimulant diuretic, in this condition. Scarcely a nook or hamlet anywhere but has many enthusiastic users. Ask your neighbors.

Huge Orchid Garden

A luxuriant orchid garden containing 7,000 plants and representing many species of the tropical flower has been taken over by the Missouri Botanical Garden from C. W. Powell of Balboa,

Mr. Powell has made a special study of the orchids of Panama and has more than doubled the number of species formerly known from that country, besides discovering more than a hundred species previously entirely unknown to science. The orchid gar-

den will be maintained in the Cana-
gian as an experimental tropical gar-
den.

**Drink Water
If Back or
Kidneys Hurt**

Begin Taking Salts If You
Backache or Have Bladder
Weakness

Too much rich food forms stools which excite and overwork the kidneys in their efforts to filter it from the system. Flush the kidneys occasionally to relieve them like you relieve the bowels, removing acids, waste and poison, else you may feel a dull misery in the kidney region, sharp pains in the back or neck, headache, dizziness, the stomach souring, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, the channels often get irritated, obliging one to get up two or three times during the night.

To help neutralize these irritating acids and flush off the body's urinous waste, begin drinking water. Also get about four ounces of Jad Salts from any pharmacy, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine and bladder disorders disappear.

This famous salt is made from the acid of grapes and lemon juice, combined with lime, and has been used for years to help clean and stimulate bladdered kidneys and stop bladder irritation. Jad Salts is inexpensive and makes a delightful effervescent lithia-water drink which millions of men and women take now and then to help prevent serious kidney and bladder disorders. By all means, drink lots of good water every day.

Worth It

New York—John M. Reiss, a nephew, has been awarded a fortune that requires three hours to count. It consists of \$4,451.80 in pennies, dimes, nickels and quarters, found in the room of Mrs. Tillie Reiss.

**SCIENCE IS USED
TO BARE CRIME****Novel Apparatus Registers
Guilty Excitement.**

New York.—Using specially devised apparatus to measure the electrical resistance of the human skin and an electrical stethoscope which enabled the audience to hear the thumping of the heart of the person under examination, Dr. A. P. Link, instructor in psychology at New York university, demonstrated to the New York Electrical society how science can aid in detecting and apprehending criminals.

Three persons selected from the audience were sent out of the room under sealed instructions. One of the trio chosen by lot went to a room on the tenth door of the building where a letter was taken out of an overcoat pocket.

From the envelope \$10 was removed, the letter was replaced and the "culprit," whose identity was not disclosed to Doctor Link or those in the audience, returned to the auditorium.

Doctor Link then subjected each of the three to electrical psychology tests. The emotions aroused by the guilt of the "robber" became instantly evident on the records of the apparatus.

An electrical stethoscope, specially devised by the Bell Telephone laboratories, amplifying the heart-beat sounds more than 100,000 times, enabled the audience to hear the thumping of the heart. When the young man who had opened the envelope and removed the \$10 was asked questions bearing on the "robbery" his quickened thumping of heart when the key words mentioned was instantly made evident.

In addition to the quickened heart beat of the one who removed the \$10 from the envelope, "guilty excitement" was also demonstrated in the form of a moving spot of light thrown on a screen in full view of the audience. The spot shot clear across the screen when the person questioned became evidently excited.

Doctor Link explained that excitement lowered the electrical resistance of the skin. This, he said, was especially when an effort was made to lie or to conceal the truth.

According to Doctor Link this reaction is entirely outside the control of the person examined. He said this apparatus was "a complete give-away of the emotions which the robber was attempting to conceal." Doctor Link also explained a number of psychological tests, electrical and otherwise, now in use for the selection of employees, either for hire or promotion. He said these tests must not be used as infallible guides, but as an aid to the general common sense.

Ample Coal in Colombia**for World 500 Years**

Chicago.—When American coal supplies are exhausted, the world may look to the republic of Colombia for fuel. Dr. Alberto Benavides, consul of Colombia, said here in planning for the welcome in Colombia to be extended the Illinois manufacturers and merchants who visit his country in February.

"Colombia," Doctor Benavides said, "has enough coal to furnish the world its supply for the next five centuries."

Leaving Chicago, February 1, a group of 28 Illinois manufacturers and merchants will take a Caribbean sea cruise for trade promotion purposes, touching two ports in the republic of Colombia—Barranquilla and Puerto Colombia.

"This treasure land of promise," Doctor Benavides said, "is nearer to the United States than any other South American country."

"Gold is found in almost a free state in every river of the republic. Every mineral known to mankind is found in Colombia in abundance. There is one part where the platinum of the world is produced."

Section Hand Heads**\$2,000,000 Business**

Marysville, Kan.—From railroad section employees to controller of a \$2,000,000 manufacturing corporation in a few days has been the accomplishment of James W. Reynolds of this city.

Reynolds obtained a loan last month from his job with the Union Pacific railroad here, and a few days ago a corporation to manufacture a railway spike of which he and two associates have control was organized in Chicago. The concern is the Superior Spike company.

About the time of the World War Reynolds invented a boltless rail joint. He was without capital to market his invention, the day on the right of way he found a spike which contained the name of C. E. Evans, Illinois, N. M., roadmaster for the Santa Fe railroad, who at that time was president of a switch manufacturing company with headquarters at Kansas City.

They became acquainted and a partnership was formed to introduce the boltless rail joint.

They became acquainted and a partnership was formed to introduce the boltless rail joint.

**HOME OF CHARLIE
ROSS IS WRECKED****Recalls Famous Kidnapping
Case of 1874.**

Philadelphia.—Bowing to time, showing signs of age in its vacant windows, and its moss covered, drooping verandas, a bleak, weather-beaten house, perhaps the most interesting structure in Philadelphia except Independence Hall, today is crumbling under the blows of the paxek and the wrench of the crowbar.

This stolid three-story dwelling, of "the capula era," rising on its high knoll above one of the declivities of Washington Lane, in Germantown, once sheltered Charlie Ross, the boy whose disappearance has remained one of the mysteries of America and whose name through a half century was carried in hope, anxiety and despair to all corners of the earth.

Now it is being torn down to make room for the progress of a new generation which remembers little of the tragedy which came to the occupants of this old house.

Mansion Became Church.

The Ross mansion, for the last decade, has been the seat of the Cliveden Presbyterian church. With the growth of the congregation it was found inadequate and a new church has been erected to the rear of the house. Now the house itself is being razed and on its site another church is to be built.

In the disappearance of the Ross home, Philadelphia loses one of its greatest shrines of the curious. From every section of the country have come visitors to gaze in awe at the old stone dwelling which has stood throughout the years a mute reminder of the tragic search for the lost boy.

More than fifty-two years have passed since that July day in 1874 when golden-haired Charlie, four-year-old son of Christian K. Ross, disappeared. The boy was playing on the lawn of his father's estate when he was enticed away by two men believed to have been responsible for his death, William Mosher and an accomplice drove up to the estate in a spring wagon and with promises of candy and a ride lured Charlie and his elder brother, Walter, into the wagon.

The four drove off and at the corner drug store some distance away Walter was given 25 cents to buy candy. When he returned with his purchases, the wagon, the two men and his little brother had disappeared. Charlie was never seen again by his family.

Until his death 23 years later, Christian Ross, the father, spent his life and fortune in an unsuccessful worldwide search for his boy, but no definite word was ever received concerning him.

Several times messages emanated from Mosher, promising Charlie's return if a large ransom were paid, but holding none of the desperate father's attempts to comply with these requests.

Finally, without betraying the secret of Charlie's fate, Mosher and his confederates were killed in another city during an unsuccessful burglary.

Stories of Bay Plentiful.

Reports of oil wells spread over the country as to the fate of Charlie Ross. Some say he was killed by Mosher or died while held a captive. Others were of the opinion that he is alive and from time to time claimants to his name have appeared.

Shortly after the old Ross home was sold to the Cliveden church, Mrs. Ross died, on December 13, 1912. Walter Ross, Charlie's brother, and his sister, Miss Sophia L. Ross, survive and are living near Philadelphia.

Only the old, weather-beaten house has remained, the solitary reminder to curious visitors of the most famous kidnapping case of the last century. That now is crumbling to dust, and Charlie Ross, fading out as a memory, is crystallizing as a tradition.

The measurement is ten feet as fine as obtained by any previous method, Bureau experts said. In making the measurement it is believed to be of great value, as it is estimated that light travels nearly two miles in one hundred thousandths of a second.

A tuning fork, a pendulum swinging in a vacuum, a photoelectric cell, an oscilloscope or tiny mirror mounted on two wires to a strong magnetic field, and a high speed camera constituted the measuring apparatus.

**PUPILS' HONESTY
IS PUT TO TEST****Rich Children More Prone to
Steal Than Poor.**

Philadelphia.—Showing signs of age in its vacant windows, and its moss covered, drooping verandas, a bleak, weather-beaten house, perhaps the most interesting structure in Philadelphia except Independence Hall, today is crumbling under the blows of the paxek and the wrench of the crowbar.

The tests are being made by psychologists engaged in a "character education inquiry" at the Columbia university.

A majority of the pupils were reported as lying, when asked questions to which they felt an affirmative answer should be given. For instance, to "do you read the Bible every day?" Ninety per cent said they did, according to Dr. Mark A. May, one of the psychologists.

Doctor May is on a three-year leave of absence from the Syracuse university faculty.

Ingenious tests were devised to measure such abstract quantities as stealing, lying and cheating tendencies. Children were asked to solve a puzzle which involved the use of 60 cents in various coins. The object was to see how many would take the money.

Among the 250 Jewish orphans of New York's East side only ten dimes disappeared. When the same test was given to children of the rich in an exclusive school it was found 18 per cent took money, while in one case the coins disappeared, box and all, and in another a pupil hid a 25-cent piece, claimed an error and asked for a second chance.

Manor Became Church.

The Ross mansion, for the last decade, has been the seat of the Cliveden Presbyterian church. With the growth of the congregation it was found inadequate and a new church has been erected to the rear of the house. Now the house itself is being razed and on its site another church is to be built.

PROFIT OR LOSS IN POULTRY

"As a direct result from club work I have learned how to kill and dress poultry in the dry pick method, how to select the fowls from the layers, how to select the breeding pen and in fact how to manage a flock of poultry in a profitable manner," writes Ronald Kennedy of Bethel, who won the state poultry management championship in boys and girls club work for 1926 and from his studies and record one is impressed by the fact that he not only learned these things but he applied them to his business.

This 17 year old Bethel boy, son of Steven O. Kennedy, seems to have learned something of a habit of winning county championships in poultry management with three to his credit in his four years of club work and as a climax to his efforts that he was for second time the state champion in the line of work over which he is very enthusiastic.

"Profit or Loss" is the title of the story he has written about his business' work. It is easy to see from reading the story how he happened to win the state championship again. He says:

"You can easily turn profit into loss. One way is by incorrect management.

The poultry business pays and pays well if managed right. A synonym for profit is poultry; profit and carelessness do not thrive in the same locality; neither will poultry and carelessness.

"My favorite breed is the White Wyandotte. I had a flock of forty standard breed hens to winter. These birds were healthy, vigorous, and very productive; weighing from five to six pounds each.

"I never saw a louse or a mite in the house or on the hen for I had an ever-ready dust bath of fine sand, ashes, and insect powder besides carbon and sulphur fumigators.

"I used an open front, therefore, was assured of good ventilation and dry litter. I had the Orono style roosts and nests and can find no substitute. To keep the water and manure free of litter, I put the dishes on boxes about a foot from the level of the litter. I made it a practice to clean off the dropping boards daily, then sprinkling them with sandust, thus no odor prevailed."

"I've found that in satisfied customers is where your high market prices lie. I had a bi weekly route of twelve good customers who knew they were getting "the best" and freshest eggs obtainable and were willing to give a supersize. I sold my poultry at an amount where top prices were paid.

"I selected a breeding pen of ten healthy females and a top top cockerel. I set ten hens with thirteen eggs per setting, which was paid to the boys and girls by bearing the Bethel Church School, so the same reward will be given to the adults if they go ahead of the adults of the Bethel Church in numbers on Sunday for the winter. The contest is on! Result?

CHURCH ACTIVITIES

BETHEL METHODIST CHURCH

Chester B. Oliver, Minister

The minister will speak on Sunday

morning, using the topic, "The Sources

of Christian Conviction."

In the evening at 7:30 unless union plans mature

the minister will speak to the young

people on the theme, "The Big Word

for Yesterday and To-Morrow."

Students preparing for teaching, homes

where parents want the teacher's influence

to be the best; people who care

about the influence of the Church School

teacher and the minister and his wife in

the community will profit, we think, by

this message at 7:30 Sunday night. Rev.

Robert Haldane's story of the false

teeth will be included in this message.

Men will appreciate this and women

will say, "Oh, he does not mean us."

That happened elsewhere." Usually the

best kind of parents are those who add

to their punishment to that received at school.

If the church "fights" why not help to

put the cost on wherever it ought to

be? Some people stand ready with a

pitch fork and toss the truth like hay

to neighbor.

Lubec—New smoked fish plant may

be established here soon.

Augusta—Erection of new paper

machine for manufacture of newsprint at

Penobscot Paper Corporation nearing com-

pletion.
